Video

Welcome to my world of play! Since 1987, I have been creating unique playgrounds for children, both public and private, using only all natural redwood. With my team of "play professionals", we build and install green play structures and treehouses to endure for generations. We offer both pre-designed and custom-designed play houses. Tough terrains, challenging spaces and unusual requests are my specialty: let me design a tree fort, clubhouse, or swing set specifically for your tree, your home, your dreams... Barbara
